## Cloud & Hybrid Solutions

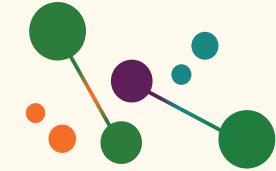

Cloud computing is the delivery of IT services over the internet.

Cloud computing is constantly evolving, which is why we have a dedicated technical team who research and test the latest and best cloud solutions available. By hosting your existing systems and applications in the cloud, you minimize the risk of data loss and improve your ability to work remotely.

By partnering with some of the world's leading cloud solution providers, we can help you maximize your cloud solutions and infrastructure, scaling them to meet your business's needs.

Green IT optimizes Amazon Web Services, Microsoft Azure, Office 365, Google and Alibaba Cloud.

Yours IT Partner

**Green IT**

## Infrastructure Services

Green IT delivers a full set of services to keep your IT Infrastructure reliable with on-going Infrastructure administration, continuous monitoring and prompt troubleshooting. We are also ready to plan, implement and manage changes in your IT environment to support the uninterrupted flow of your business operations.

**These services are designed to help your organization:**

- ✓ IT Infrastructure Consulting
- ✓ Infrastructure Management
- ✓ Wide Infrastructure Services
- ✓ Cloud Migration Services
- ✓ Cloud Infrastructure Services
- ✓ Data center Management
- ✓ Virtual Desktop Infrastructure Services

# Green IT

## Network Security Services & Solutions

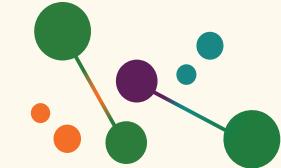

Network and security are the pillars of the current digital world. Businesses across the globe are rapidly scaling up their processes to keep up with the changing customer demands and technological landscape.

Our highly experienced and certified security team can assist with your current challenges or we can deliver an end-to-end security practice as a managed service.

**We, Green IT offers comprehensive security service revolving around:**

- ✓ Next Generation Firewall and Advanced Threat Management
- ✓ Zero-Day Malware detection and prevention
- ✓ Security policy implementation
- ✓ Application Threat Protection
- ✓ Backup and Disaster Recovery
- ✓ Web Security
- ✓ Endpoint Protection

## Green IT

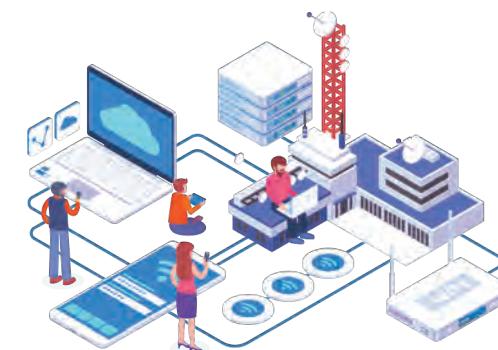

### Wireless Network Solutions

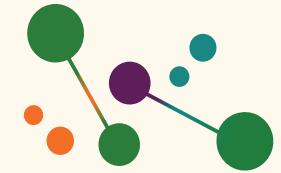

Wireless links two or more devices over a short distance using a wireless distribution method, usually providing a connection through an access point for internet access. Allow users to move around within a local coverage area, and still remain connected to the network.

We, Green IT can assist you and at every stage with our end-to-end solutions.

Our technical and support teams will then guide you through the network design, installation and post-deployment.

- ✓ Controller, controller-less, and cloud-managed options
- ✓ Point to Point, Point to Multi-Point options

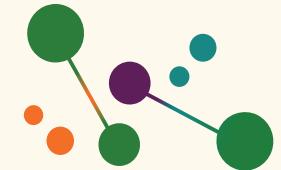

# Green IT

## Remote Monitoring & Management Solutions

Remote Monitoring & Management can help businesses gain insight into the performance, health, and status of their various IT assets. They can also help IT professionals discover new assets, detect issues and resolve them remotely. With properly maintained remote monitoring, businesses will improve both network performance and network security.

- ✓ Monitor IT assets including endpoints, computers, and applications
- ✓ Monitor network performance, security and availability
- ✓ Discover and track IT-related issues
- ✓ Allow remote administrators to access endpoints

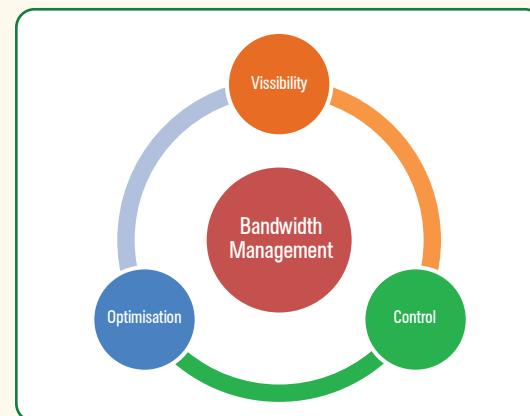

## Green IT

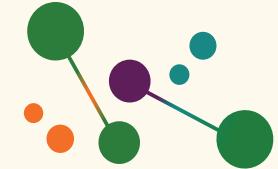

### Bandwidth & WAN acceleration Management

WAN acceleration use cases include the following:

- ✓ Improving response times for business applications over WAN links and mobile connections;
- ✓ Optimizing traffic from data center to data center for faster storage replication;
- ✓ Improving enterprise investment in bandwidth; and
- ✓ Moving traffic across hybrid WANs that include public cloud connectivity to access cloud applications.

- ◎ Limiting bandwidth for data transfers
- ◎ Reserving bandwidth for specific services
- ◎ Data Flow Monitoring
- ◎ Managing User Policies
- ◎ WAN Link Clustering

# Green IT

## Endpoint Protection & Management Solutions

Endpoint protection involves monitoring and protecting endpoints against cyber threats. Protected endpoints include desktops, laptops, smartphones, tablet computers, and other devices. Various cybersecurity solutions can be installed on and monitor these devices to protect them against cyber threats regardless of where they are located on or off of the corporate network.

We, Green IT ready to help you to reduce the risk of attacks and prevent them from happening, please contact to our Licensing & Endpoint Security Management Team at [licensing@greenitmm.com](mailto:licensing@greenitmm.com)

## Raised Floor Systems Solutions

Raised access flooring plays a critical role for wire management and air distribution for any environments housing electronics, wiring, and other technical operations. If you're interested in clearing clutter from your office building or server room with a low maintenance solution, a concrete raised floor is the right fit.

When designing or redesigning your data center, you'll need to choose between raised flooring and slab flooring before you can make other decisions. While raised floors may not be the right solution for every data center, they can provide a number of powerful advantages when used and maintained properly.

- ◎ Steel Raised Floor System
- ◎ Concrete Raised Floor System
- ◎ Wood core Raised Floor
- ◎ Aluminum Raised Floor
- ◎ Calcium Sulphate Raised Floor

# Green IT

## Haas Services & Solutions

Purchasing hardware ties up your working capital when it could be put to better uses Hardware as a Service Haas permits you to make lower, consistent "off ledger" operational expenditure payments each month to access the same equipment!

We, Green IT offer rentals such as Server, Storage, Dedicated Servers, Router, Switch, Firewall, Wireless, Network Hardware as well as Lab Rental.

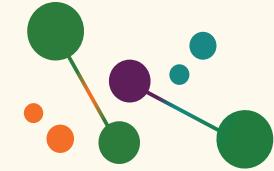

If you need certain pieces of hardware, but you're not ready to invest in purchasing it, reach out to us today at server ;

[server.rental@greenitmm.com](mailto:server.rental@greenitmm.com)

[info@greenitmm.com](mailto:info@greenitmm.com)

We let you rent the hardware you need for as long as you need it, at prices that fit your IT budget.

# Green IT
